WELCOME

Welcome to our annual on Property Sale 2023

ALL ABOUT HEREFORD ~ ALL ABOUT BEEF

This year, we are offering 55 young sires; 41 of which are PP (Homozygous Polled) and backed by high ranking performance data and sound phenotype for longevity to suit all aspects of the industry. In the last number of years, we have embraced technology and now we are seeing the fruits of our labour whilst not forgetting those phenotypical and physical traits that we have always valued.

- | | |
|----------------------------------|--------------------------|
| 1. Confirmation | 4. Eye pigment & setting |
| 2. Fertility & mothering ability | 5. Skin & hair |
| 3. Temperament | 6. Doing ability |

Whilst we all acknowledge that the cattle market has softened, quality, high performance cattle still achieve high results and still sell at a premium. The time to invest in top shelf genetics has never been better, to be ready for the return of the market force. While the population continues to increase worldwide; the thirst for high quality protein source with top shelf eating quality will increase along with it. With the increased demand for high quality protein, it is paramount that the protein continues to remain affordable to the consumer.

Whilst not forsaking the basics of calving ease, fertility, growth and milk, this catalogue of bulls are:

- * 75% above breed average for IMF and
- * Over 50% of bulls are double the breed average for IMF
- * Large percentage above breed average for EMA and
- * 80% above breed average for scrotal

The O'Leary family would like to thank Mark Duthie and GDL Dalby for handling the sale and the friendship and service throughout the year.

We at Remolea would like to wish you the best with your purchase and thank you for your interest and competition.

SALE INFORMATION

GST: GST is to be added to the purchase price at the fall of the auctioneer's hammer. You will be invoiced the purchase price plus GST.

REBATE:

- A **rebate of 5%** will be paid to all agents who attend the sale with or on behalf of their client(s) and settle within 7 days of date of invoice.
- A **rebate of 1%** will be paid to all agents who do not attend the sale but introduce clients and settle within 7 days of date of invoice.
- **Introductions must be in writing, email or fax and can be sent to the vendors or mduthie@grantdaniellong.com.au at least 12 hours prior to the sale.**

INSPECTION: Bulls may be inspected prior to the Sale by contacting vendors or selling agents or on the morning of sale day.

HEALTH: All bulls have been vaccinated with 7 in 1, 3 Germ Blood, BEF vaccine (3day sickness), Pestigard and Vibrovax. Drenched with Commodus injectable. Tested free of Pestivirus and genetic diseases. Verified to sire. Semen and Morphology tested.

INSURANCE: There is no Vendor Insurance on Sale Bulls. It will be the responsibility of the purchasers to insure their bulls. Representatives from Insurance Companies will be at the sale and can offer insurance terms on sale bulls.

SALE VENUE: Sale venue as per map on back page is located 48 klms north west of Warwick and 64 klms south of Toowoomba.

REFRESHMENTS: Refreshments will be available on sale day.

GUARANTEE: All bulls have been semen and morphology tested and will be sold as fertile and capable of natural service at the time of sale. In the unlikely event of infertility due to reasons other than injury, disease or misadventure, the vendors will, upon the production of a mutually agreed veterinary certificate, at the purchasers expense and within six months of the date of purchase and return of the bull, issue the purchaser with a credit note equal to the price of the bull in the vendors future sales.

ACCOMMODATION:

- **Royal Hotel Leyburn** (07) 4695 0129 located 21kms from Remolea;
- **Clifton Arms Hotel** (07) 4697 3154 located 23kms from Remolea;
- **Pittsworth Motor Inn** (07) 4693 2888 located 42kms from Remolea;
- along with a wide array of accommodation in Warwick (located 48kms from Remolea) & Toowoomba (located 60kms from Remolea).

DISCLAIMER & DELIVERY TIPS

DISCLAIMER: The owners, employees, sale staff and representatives accept no liability for accidents that occur, although these are rare at cattle sales, any person attending does so at their own risk, While all care has been taken in the preparation of this sale catalogue, the vendors accept no responsibility for any errors or omissions contained in this publication.

LANDING YOUR BULL HOME: The most important part of your new bull's future on your property is his arrival home. A couple of important things are:-

- 1) Ask your carrier to use electric prodders responsibly.
- 2) If possible have some females in the yard and keep them and the bulls in overnight. Preferably with some hay.
- 3) If females are unavailable and if time permits hold the bulls in the yard for a few days until the bull seems to be used to their new surroundings.

HornPoll

Understanding the horn / poll status of a bull is a very important aspect when determining whether a potential new bull meets your breeding objectives.

Genotype	Status	Explanation
PP Homozygous Polled	Polled	This animal possesses two copies of the poll variant of the gene. This animal is highly likely to express a polled phenotype and should always pass a poll variant to its progeny.
PH Heterozygous Polled	Carrier	This animal carries one copy of the poll variant and one copy of the horn variant of the gene. This animal is highly likely to express a polled or scurred phenotype and will transmit either the horn or poll variant to its progeny.
HH Homozygous Horned	Horned	This animal carries two copies of the horn variant of the gene. This animal is highly likely to be horned and will always transmit the horn variant to its progeny.

Big Enough To Count,
Small Enough To Care..

REFERENCE SIREs

CALLAWAY WRL HS MEGATRON M004 (AI) (TW) (PP)

Megatron was purchased in 2017, as a yearling. Megatron is sired by the well performed sire, Matariki Holy-Smoke, out of a top female with volume and style. Megatron is a high indexing sire with below average birth, high growth, calving ease and IMF ranked in the top 10% of the breed. Megatron is breeding true to type and having a huge impact on our breeding program. Megatron sons have topped our three previous sales: Remolea Rochester R084, sold to B & C Anderson Clermont for \$26,000 in 2022; Remolea Quicksilver Q092 sold in 2021 to the Bruggemann Family Trust, Taroom.

WIRRUNA LEDGER L285 (AI) (PP)

Ledger was purchased in 2020 as an aged Sire, from Terraneil Poll Herefords of Western Australia. He is trait leader for 200 day, 400 day and Scrotal Size. Ledger is a proven sire who has been widely used across Australia and New Zealand. Ledger is a bull with impeccable structural soundness, with many that have seen him describing him with perfect feet. He breeds cattle with extra shape and thickness.

REFERENCE SIREs

DALKEITH NIPPER N082 (P)

Nipper is a bull with a lot of power and performance. Nipper has exceptional length and volume, muscle and has a terrific skin and hair type. Nipper has an exceptional set of Data Combining carcass, growth and fertility. Nipper ranks in the top 1% of the breed for Southern Self Replacing and Northern Self Replacing. Another feature of the Nipper progeny is the terrific disposition they display.

RUSSLYNN JACK FLASH (P)

Jack Flash was purchased in 2015. Jack Flash has been used over heifers very successfully. They are easy calvers, with a good growth pattern. J49 is in the top 10% of the breed for calving ease and a trait leader for scrotal size along with shorter Days to Calving. Sons have sold to a top of \$18,000 Remolea Quest Q081 to E Bailey and Co, Miles. Another son Remolea Matador M014, topped our 2018 sale, selling to Montgomery Pastoral Co.

YAVENVALE NOCKOUT N312 (AI) (PP)

Nockout is a rare and special, curve bending sire. He has an exceptional spread of data consisting of top 5% calving ease, gestation length, 200, 400, and 600 day weight. He also drops back to below average for Mature Cow Weight. This means Nockout breeds cattle with high growth, yet moderate and low maintenance for easy keeping females. Nockout also boasts high milk, scrotal and top 1% IMF. Nockout is breeding very consistently across Australia and New Zealand. A bull that adds value and profitability to modern and progressive beef herds. *First sons sold at Yavenvale in 2022 for a top of \$28,000 with an average of \$15,000 and a maternal brother making \$74,000.*

UNDERSTANDING EBVs ... a brief guide to breedplan

The following is a brief description of GROUP BREEDPLAN EBVs and Accuracies. GROUP BREEDPLAN is an advanced genetic evaluation system that provides a genetic description of cattle for a range of traits influencing fertility, growth and carcase performance. It provides predictions of the genetic merit of individual animals called Estimated Breeding Values (EBVs). EBVs are based on all available pedigree and performance records provided by breeders in Australia and New Zealand, along with available overseas genetic information. EBVs are expressed in the units of measurement for each particular trait, and are shown as +ive or -ive differences from the breed base. The average EBV for different traits changes over time as the breed makes genetic progress. The averages for calves born in 2015 are shown below. These averages provide a useful benchmark for comparisons of EBVs for individual animals.

ACCURACY (%) ~ Provides an indication of the reliability of an EBV. As more performance information becomes available on an animal (or its progeny, or relatives) then the accuracy of its EBVs for particular traits will increase. **CALVING EASE DIR (%)** ~ Estimates of the genetic differences between animals in the ability of their calves from 2 year old heifers to be delivered without assistance. **CALVING EASE DTRS (%)** ~ Estimates of the genetic differences between animals in the ability of their 2 year old daughters to calve without assistance. **GESTATION LENGTH (DAYS)** ~ Estimates of the genetic differences between animals in the number of days from the date of conception to the calf birth date. **BIRTH WT (KG)** ~ Estimates of the genetic differences between animals in calf birth weight. **200-DAY WT (KG)** ~ Estimates of the genetic differences between animals in liveweight at 200 days of age. **400-DAY WT (KG)** ~ Estimates of the genetic differences between animals in liveweight at 400 days of age. **600-DAY WT (KG)** ~ Estimates of the genetic differences between animals in liveweight at 600 days of age. **MATURE COW WEIGHT (KG)** ~ Estimates of the genetic differences between animals in cow weight at 5 years of age. **MILK (KG)** ~ Estimates of the genetic differences between animals in milk production, expressed as variation in 200-day weight of daughter's calves. **SCROTAL SIZE (CM)** ~ Estimates of the genetic differences between animals in scrotal circumference at 400 days of age. **DAYS TO CALVING** ~ Estimates of the genetic differences in female fertility, expressed as the number of days from the start of the joining period until subsequent calving. **CARCASE WEIGHT (KG)** ~ Estimates of the genetic differences between animals in carcase weight, adjusted to 650 days of age. **EYE MUSCLE AREA (CM²)** ~ Estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site, in a 300kg carcase. **RIB FAT (MM)** ~ Estimates of the genetic differences between animals in fat depth at the 12/13th rib site, in a 300 kg carcase. **RUMP FAT (MM)** ~ Estimates of the genetic differences between animals in fat depth at the P8 rump site, in a 300kg carcase. **RETAIL BEEF YIELD % (RBY%)** ~ Estimates of the genetic differences between animals in percentage retail beef yield, in a 300kg carcase. **INTRA-MUSCULAR FAT % (IMF%)** ~ Estimates of the genetic differences between animals in percentage intramuscular fat (marbling) at the 12/13th rib site, in a 300 kg carcase.

Note: BREEDPLAN Figures cannot be compared between breeds, ie between Angus and Hereford/Poll Hereford. Breed Average EBVs for the 2021 Born Calves.

Breed Average EBVs for the 2021 born calves

NOTES

304 O'Leary Road | Ellangowan (via Clifton) Qld 4361

Remolea is located 48 kms down the Condamine River from Warwick, 24 kms west of Clifton and 64 kms south of Toowoomba. Established in 1962, our aim has always been to breed soft easy doing cattle. We place great emphasis on functional, fertile cattle, as they are run under commercial conditions. Temperament, skin, hair colour & quality are high on our priorities. We have also endeavoured to breed an even line of cattle (bulls) rather than individuals.

Thank you for supporting the 2023 Annual Bull Sale
